

When trust brings thrust – A logistics partner for lessors and asset owners

As long time logistics partner to the aerospace industry, we continue our 30-year practice of turning the challenges of the market into opportunities for our customers. Our approach is summarised in three main pillars:

1. Attainable outcomes

- Lean logistics solutions that cover all contingencies - anytime
- Global availability in answering urgent requests - regardless of jurisdiction
- Know-how and diligence for managing your valuable assets - from customs clearance paperwork to repossessions

2. Certified solutions

- Broad offering for the entire aircraft life cycle, including refurbishment, conversion and repossession
- Tailored supply chain that adheres to strict security standards and certifications
- Ability to clear customs across any jurisdiction
- Standard global processes combined with knowledge of local regulations
- Certified storage facilities for aircraft and engines, as well as scrap capabilities

3. Data visibility

- Full monitoring and complete visibility of all transactions in one system
- Predictive data to support decision-making for strategy and operations
- Calculation, avoidance, improvements for sustainable operations

Our 2000+ aerospace professionals, supply chain, and customs advisors are ready to move your valuable assets safely, quickly, and seamlessly. That is how we support our customers in reaching new heights.
